- ¹ Operating the laser at higher than 10% above the specified pulse energy values may result in optical damage, which is not covered under warranty
² Requires second harmonic module based on KTP (45 mJ is pulse energy specification with a LBO based second harmonic module)
³ Operation at 355 nm requires a LBO based second harmonic module for specified pulse energy
⁴ Operation at 266 nm requires a KTP based second harmonic module for specified pulse energy
