FIELD SERVICE BULLETIN

DATE ISSUED: 18 July 2011

NUMBER: 623

SERVICE UPDATE

PRODUCT Chameleon Ultra Range

PURPOSE The intent of this FSU is to provide an update to field service of change in top level part number.

DESCRIPTION This Field Service Update is to clarify ordering information and new part number options for the Chameleon™ Ultra and variants. New part numbers and changes are effective immediately. The purpose of the part number change is to eliminate the Product Variance (PV) for the upgraded modelock starter mechanism. All **new** Chameleon Ultras will now be equipped with the new starter (and will therefore be OPO-ready). The existing Part numbers will be removed from the world wide price list.

Part Number Update

Old Part Number	New Part Number	Descriptor
1117782	1195408	CHAMELEON SYSTEM, ULTRA (II), 80MHz 3.5W (RoHS)
1145866	1195407	CHAMELEON ULTRA I, 690-1040 nm, 2.9 W
1145865	1195405	CHAMELEON ULTRA, 690-1020 nm, 2.5W

Chameleon Vision part numbers are **not** affected at this time. Existing numbers should continue to be booked, i.e. 1185373 / 1185374 / 1185900 / 1185896 for Vision I / Vision II / Vision I Olympus / Vision II Olympus respectively. New part numbers for Vision lasers will be released later in quarter (Q4 FY11) and will be communicated separately. Vision-S lasers are already equipped with the new design.

Equivalent refurbished part numbers for the new numbers given above are not released at this time but will be rolled out during the current quarter (Q4 FY11).
